PROFESSIONAL SUMMARY

MERN Stack Developer with **2.8+ years** of experience designing and delivering scalable full-stack web applications for enterprise B2B SaaS platforms. Proficient in **React.js**, **JavaScript (ES6+)**, **TypeScript**, **Node.js**, **Express.js**, **MongoDB**, **Redux Toolkit**, and **RESTful API development**, with expertise in full-stack architecture, reusable component libraries, database integration, JWT authentication, and frontend performance optimization in **Agile/Scrum** environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, React Hooks, React Router, React Flow, Webpack, Vite, Responsive Web Design

State Management: Redux Toolkit, Redux Persist, TanStack Query (React Query), Context API, Zustand

Backend: Node.js, Express.js, RESTful API Development, MongoDB, Mongoose, JWT Authentication, bcrypt, Middleware, CRUD Operations, MVC Architecture, Data Validation, Error Handling

Full Stack: MERN Stack, Full-Stack Development, Frontend-Backend Integration, API Integration, Component-Based Architecture, Server-Side Rendering

Tools & Practices: Git, GitHub, Axios, Postman, VS Code, Jira, Vercel, npm, ESLint, Agile/Scrum, Code Review, Cross-Functional Collaboration, Technical Documentation

PROFESSIONAL EXPERIENCE

Associate Software Engineer | Resulticks Edge Solution Pvt. Ltd

Jan 2024 - Present

- Engineered enterprise full-stack **React.js** features using **JavaScript (ES6+)**, **TypeScript**, **Node.js**, and **Express.js** for a B2B marketing automation SaaS platform, delivering scalable modules across **Audience**, **Campaign**, **Dashboard**, **Analytics**, and **Notification**.
- Architected **20+ reusable UI components** using **React.js**, **Redux Toolkit**, **Context API**, and **Kendo UI** following **component-based architecture** and **MVC design patterns**, reducing feature development time across **5+ product modules**.
- Designed and integrated **15+ RESTful APIs** via **Axios** and **Express.js** for async data fetching, real-time state synchronization, form workflows, and frontend-backend integration across all modules.
- Optimized **React.js** frontend performance by **25%** via lazy loading, code splitting, memoization (**useMemo**, **useCallback**), and render optimization, reducing page load time and improving user retention.
- Built a **multi-campaign visual workflow builder** using **React Flow** with node-based UI, drag-and-drop canvas, dynamic validation, and **Redux Toolkit** state management, enabling non-technical users to build automation workflows without engineering support.
- Collaborated in **Agile/Scrum** sprints with product, design, backend, and QA teams, contributing to sprint planning, peer code reviews, and retrospectives to deliver **5+ production-ready features** on schedule.

Full Stack Developer Intern (MERN) | Error Makes Clever

Jul 2023 - Nov 2023

- Built responsive frontend modules using **React.js**, **JavaScript (ES6+)**, **HTML5**, **CSS3**, and **Tailwind CSS** with reusable component patterns and responsive web design principles.
- Developed **RESTful APIs** with **Node.js**, **Express.js**, **MongoDB**, and **Mongoose**, implementing CRUD operations, data validation, error handling, and frontend-backend integration.
- Implemented **JWT authentication** with **bcrypt** password hashing, protected Express.js middleware, and session management as part of a complete **MERN stack** application.

PROJECTS

Sastikaa Travel Full-Stack MERN Travel Booking Platform

[Live](#) | [GitHub](#)

- Developed a production-grade **MERN stack** travel booking platform using **React.js**, **Node.js**, **Express.js**, **MongoDB**, **Mongoose**, **Redux Toolkit**, **Axios**, and **RESTful APIs** supporting destination discovery, package browsing, and end-to-end booking workflows.
- Engineered a scalable **Node.js/Express.js REST API** backend with **MongoDB/Mongoose** implementing full CRUD operations, MVC architecture, input validation, and error handling middleware.
- Implemented **JWT authentication**, **bcrypt** password hashing, role-based protected routes, and security middleware for user registration, login, and booking access control.
- Achieved **30% improvement** in performance via lazy loading, image optimization, code splitting, and **TanStack Query** server-state caching, improving responsiveness across desktop and mobile devices, including single-page application (SPA) performance.

EDUCATION

Government College of Engineering, Bargur

2019 - 2023

Bachelor of Engineering Electrical & Electronics Engineering (EEE)

CGPA: 8.5 / 10
